PRESS RELEASE

jadian enterprises Teams Up With ASI Food Safety Consultants

Will provide supplier audit management services and technologies to the food industry

Lansing, February 27, 2007: jadian enterprises, inc has signed a partnership agreement with ASI Food Safety Consultants of St. Louis, Missouri. ASI is offering food companies a new service called "Supplier Audit Management", which helps food companies ensure that their entire supply chain is being properly audited to detect critical food safety and quality violations. The supporting technology, based on jadian software, is being marketed under the trade name Data Stream Solution.

With Data Stream Solution, ASI can manage a client's entire global supply chain audit function. ASI schedules supplier audits at predetermined frequencies, records all of the violations discovered during the audit, works with the supplier to develop corrective actions, manages samples and lab results, and tracks supplier certifications. Corporate quality managers can log into the system to view audit schedules and results as well as the current status of corrective actions. This information can be viewed across the entire supply chain or at the individual supplier level.

"In today's world, it's a huge challenge for companies to monitor their many suppliers around the globe," said Jeanette Huge of ASI Food Safety Consultants. "And as we have seen recently, failure to do so can be extremely costly to a company's reputation and bottom line. Our goal is be the catalyst that makes sure audits are scheduled and reports completed in a timely manner."

Data Stream Solution is a web-based system that can be deployed quickly and cost-effectively. Its flexible architecture enables customization to meet a company's unique business needs.

Results and scores from multiple audit programs, such as pest control, quality, and safety/security, can be consolidated into a single Supplier Scorecard for an easy-to-read snapshot of supplier performance.

"jadian is excited to be teamed up with a well-respected industry leader like ASI Food Safety Consultants ," said Jerry Norris, President and CEO of jadian enterprises. "ASI's extensive industry knowledge and auditing experience, in combination with jadian's software, provide a valuable solution at a time when the food industry is under a great deal of scrutiny. As a team, I think we can significantly contribute toward improved supply chain quality and safety."
