PRESS RELEASE

jadian Announces Participation on Dubai Ministry of Labor project
Software solution to help manage newly created Labor Inspection Department.

Lansing, August 31, 2006: jadian enterprises, inc announced today that it has completed the first stage of training for the Ministry Of Labor's new "Compliance Management System" and deployed the system at the Ministry headquarters in Dubai, United Arab Emirates. This training and deployment was part of the first phase in developing a technology infrastructure to support the Ministry's newly formed "Labor Inspection Department".

jadian has partnered with Intertec Systems LLC, one of the region's major players in IT systems integration, to create a technology system that mechanizes the inspection process and monitors enforcement of UAE Labor Law provisions.

The training was conducted with selective Ministry Of Labor personnel at the Royal Mirage Hotel in Dubai. The 5-day session was created and conducted by Jerry Norris, President and CEO of jadian enterprises, inc, a U.S. company and pioneer in developing such systems.

"jadian is very excited to participate on this project with Intertec," said Mr. Norris. "The training was designed to familiarize users with the new system and obtain feedback regarding future functionality. We have accomplished that goal and now look forward to moving onto the next phase of the project."

The Compliance Management System will be put in place to help the Ministry of Labor develop its Inspection Department, to help increase productivity, to automate the inspection process, to enable implementation of Risks Based Inspection and Management processes, and to offer eGovernment Services

jadian enterprises, inc
