PRESS RELEASE

jadian Awarded Dubai Roads and Transport Authority Contract *Corporate inspection and compliance management system with GPS tracking*

Lansing, Michigan (March 31, 2008): jadian enterprises, a Lansing-based compliance and inspection management solution provider, announced that it has received a sizeable contract award from the Dubai Roads and Transport Authority (RTA) in the United Arab Emirates. jadian, along with its local Dubai-based partner Intertec Systems, will provide a corporate inspection and compliance management solution based on jadian's out-of-box solution toolkit. The system is initially slated for implementation within five RTA departments: Advertisements, Right of Way, Marine, Bus, and Taxi.

The Dubai Roads and Transport Authority was established by the federal government to manage the growing roads infrastructure and public transport systems throughout the Emirate of Dubai. RTA's team of inspectors fans out across the Emirate every day to conduct inspections, note violations, and assess fines. The inspection team is responsible for enforcing Dubai's wide variety of transportation-related regulations, such as proper placement of advertisements along the roadways, construction safety, taxi cleanliness, licensing requirements, and much more.

Because of Dubai's rapid growth, RTA needed a more efficient way to obtain and process data, particularly in the area of permits and licenses, violation tracking, fee and fine management, and reporting. After a competitive review process, RTA selected jadian's Enterprise Quality Manager compliance and inspection management software, the same software currently being used by Dubai Municipality, the United Arab Emirates Ministry of Labor, and several U.S.-based organizations. RTA inspectors will collect and process inspection data with jadian's software and Intermec CN3 handheld computers. Through the use of jadian's integrated GPS solution, inspector locations and recorded violations will be mapped and made immediately available to supervisors at the home office. The system will also be integrated with the existing RTA Revenue Management system, eTraffic system, and GRP application.

"Several prestigious organizations were competing for this large and highly visible contract," said Jerry Norris, President and CEO of jadian enterprises. "The contract award marks a major milestone in jadian's growth and speaks volumes about the strength of our software."
